CELESTIAL BODY

The Celestial Body is called the Light Body because its matrix patterns are spun of actual light fibres.

This auric layer amalgamates the more structured fifth auric field and the less formed seventh auric field. It combines the necessities of choices and consequences with the truth of universal love and support. When working with the Celestial Body, we are tapping into higher truths for creating images that can be actualized in physical reality.

This energy layer disposes all veils and allows the truth to be seen.

The following is the writing from Phillip Rafferty's Kinergetics Manual:

The Celestial Body is known as the Celestial or Buddhistic vehicle. It extends out from the physical body, past the Etheric Template. Its form is less defined than the Etheric Template, and it appears like the glow around a candle as it radiates from the body. It has a gold/silver shine with an opalescent pearl quality and pastel colours of beautiful shimmering light.

The Celestial Body works with the intuition of the body. It also interprets the law within the functions and actions of each body and system, and for the whole system. It is our learned ethical sense, our conscience. It is related to the Brow Chakra intuiting the knowing that is the Universal Field, providing ethical judgment and conscious thought to our experience. Through accessing our intuition, through connecting with the silence and space between thought, spiritual ecstasy of peace, unconditional love and joy can be experienced within our physical being and mind. Divine perfection can be witnessed within all earthly matters. Inner knowing, intuition and wisdom are anchored in the mind and physical being. Divine love for humanity is experienced with the feelings of expansion due to communion with others. One can identify beauty everywhere and all things are truly appreciated.

If the Celestial Body is underactive, the field is dark and thin in places. The individual may not be able to relay their intuitive, spiritual aspects and have little experience of it. They may not even know the full joy of being inspired, or believe in God, believing you would be too gullible if you did. They can feel lost due to the lack of connection with their spiritual and intuitive aspects, not knowing exactly what they are missing. Also there is a lack of commitment to their own decision making processes, their own conscience, and own ethical sense, causing them to take on the laws and principles of others.

If the Celestial Body is over-active, individuals may be too much in their own intuition and not remain present to the physicality of their being. They may have very strong opinions and judgments that they do not re-evaluate. They may live by principles they have put in place from their own life experiences, but they do not live by the universal SPIRITUAL LAWS THAT GOVERN ALL EXISTENCE. They may judge themselves and others very harshly, and not see the perfection in all aspects of being, using judgement only to see where changes can be made and not using it for causing separation and withdrawal of love. They may see themselves as special because they can experience the mystical, and may also constantly attempt to prove that they are better than others because of it. This is of course, a defense, due to feelings of inadequacy on the physical level and due to poor grounding. The higher bodies out from the Astral Body are known as the Causal Bodies. They include the Etheric Template, Celestial Body and the Ketheric Template. They enable beings to bring Universal Consciousness into manifestation, and materialize thought, and bathe in the White Light of Love.
